DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-14 (in part) and 15-29, drawn to a method for preparing a compound of formula I, classified in class 544, subclasses 284, 287.
- II. Claims 2 and 3-14 (in part), drawn to an alternative method for preparing a compound of formula I, classified in class 544, subclasses 284, 287.
- III. Claims 30-35, drawn to a method of preparing a compound of formula 3a, classified in class 560, subclass 35.
- IV. Claims 36-40, drawn to a compound of formula 3a, classified in class 560, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions of groups I - III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are patentably distinct processes with different starting materials, reagents, and reaction steps. Furthermore, the invention of group III is drawn to a method of making an intermediate of formula 3a.
2. Inventions of group IV and group I (or II) are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if

Art Unit: 1624

the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as an intermediate for making another compound as evident by **Berrée et. al.** (cited on IDS), and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Christian Smollizza on 5-17-05 to request an oral election to the above restriction requirement, but a written restriction is requested.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
